Product Images

✓ Reduced pressure leads to a slightly larger particle size and a softer, more controllable spray, resulting in less airborne overspray
 ✓ Higher transfer efficiency - testing shows up to a 50% reduction in airborne overspray
 ✓ Fewer 'dry spray' and 'bounce back' issues, resulting in a better finish
 ✓ Doesn't create fine dust particles that linger in the air, so the room air clears out 70% faster than high pressure systems
 ✓ Better for eyes and lungs: 48% lower breathable particles in the air

Test methodology: 750 m/s/ft/s

WAGNER Control Pro Tip Selection Guide

SURFACE	COATING	100µm	150µm	200µm	250µm	300µm
Door, Jam, Siding, Sheds, Windows, Frames	Primer & Undercoat Etchcoat Primer Primer Primer Primer	Green	Green	Green	Green	Green
