Description

Atomex 260 Degree Swivel Head - 7/8" Thread

This will suit all airless spray gun extensions with 7/8" Nut or "G" thread

Made in the USA using high quality aircraft grade aluminum and features a hand tight nut design which requires no tools to fit onto your gun. Atomex 260 degree swivel heads are designed to fit onto any gun or pole extension with "G thread nut" to change the direction of the spray head. Useful when spraying cornice to ensure the spray pattern is applied evenly to the angle of the surface.

Maximum working pressure is 4200psi, suitable for all electric and petrol driven airless spray systems.

260 degree swivel heads can be joined onto the end of both gun extensions and gun extension poles.
