Description

Atomex X-900 Automatic Stainless Steel Airless Spray Gun For Line Marking Trucks with Hi-Flow Diffuser For Increased Paint Flow

The Atomex X-900 automatic airless spray guns are made to the highest quality with stainless steel construction. Single acting automatic airless spray gun has an external spring tension adjuster to assist in precise gun shut off.

The X-900 automatic airless spray gun is designed for use with road line marking trucks, the gun offers high value, reliability and a more affordable price compared with other brands. The gun is standard with 7/8"thread suitable for all Atomex, Graco, Wagner and Titan tip guard systems and has been adopted by many road marking companies around Australia as the standard paint gun fitted to trucks.

The Atomex X-900 stainless steel automatic gun is a cost effective replacement of the Graco 206513 automatic spray gun, high in quality at a much lower price with most parts interchanging.

Consider the Atomex X-900 stainless steel automatic paint spray gun next time your line marking truck guns need refurbishing, full spare parts back up will keep you spraying more lines.
