**\$4,302.30**  
**INCL. GST**

## Product Images

## Short Description

The Atomex Internal Pipe Spraying System is suitable for applying coatings to the internals of pipes between 60mm – 250mm ID. Complete package includes gun adaptor and paint hose, rated to 3600psi.

## Description

---

The Atomex Internal Pipe Spraying System features an adjustable screw control will expand the scissor arms to fit internal pipes from 60mm ID up to 250mm ID.

The conical spray nozzle allows even coating of the internal area of the pipe. Simply connect your standard airless spray gun to the 15m paint hose included in this package and you are ready to coat internal pipes up to 250mm with ease. Pressure rated to 3600psi.

Please note – The conical nozzle size is the equivalent to a 0.015” orifice, this nozzle size is only suitable for thin products such as penetrating oils, protection oils and some 2K materials. Products like high build epoxy or heavy undercoats will not pass through the nozzle and you will experience blockages.

### **Atomex 60mm – 250mm Internal Pipe Sprayer Package Includes:**
