The Graco LineLazer V 200HS is the most common Graco line marking machine sold in Australia. Standard

with two guns the smooth hydraulic drive will spray constant lines over a long distance effortlessly without pulsation. Suitable for contractors and local government councils.

Description

The Graco LineLazer V 200HS is the most common Graco line marking machine sold in Australia. Standard with two guns the smooth hydraulic drive will spray constant lines over a long distance effortlessly without pulsation.

The Graco 200HS line marker can be used for a wide variety of line marking applications such as car parks, temporary road marking & airport taxi ways etc.

Coupled with the Graco Heavy Duty Line Driver (Part no. 262005) this transforms the machine from a heavy duty push line marker to a full ride on line marking system.

The Graco 200HS together with the Heavy Duty line driver can be used on airports for spraying taxi ways, threshold lines and even centre lines up to about 600mm wide used on many regional airfield runways around Australia.

The reliability of the Graco 200HS makes this the ideal machine for regional councils in Australia because of the long service life of over 10 years. Maintenance service intervals for this machine can be anywhere from 12 months to 36 months requiring only minor maintenance.

Graco LineLazer V 200HS is capable of spraying waterborne line marking paints and also chlorinated rubber (solvent line marking paint) with ease. The piston pumps in these models are large enough to pass minor rubbish in the paint through the pump whereas a smaller pump may block or cause problems.

Graco LineLazer V 200HS Custom Line Marking Packages For City Councils -

AA Spray have specialised in Graco line marking equipment since 1993 supplying government and councils all over Australia. We can supply Graco line marking equipment with modifications such as conditional registration packs fitted for working on public roads and car parks.
