Short Description

Converts your LineLazer striper machine to a rideable unit which can double production and accuracy while reducing operator fatigue. Great for large jobs, big parking lots and road striping.

Description

Converts your LineLazer striper machine to a rideable unit which can double production and accuracy while reducing operator fatigue. Great for large jobs, big parking lots and road striping.

Is the speed that you walk hindering you production? Is walking miles on pavement day after day taking its toll on you? Are you fatigued before the day is done? Have you sustained an injury or developed a health problem that affects your ability to push and pull your LineLazer? If you have answered yes to any of these questions, this may be just what you need!

- Goes forward up to 16 km/h!
- Reverse up to 10 km/h
- New "Cool Grey" operator seat - 20% cooler than black seats
- Dual Foot Pedal Controls
- 160cc Honda GX
- All Graco LineDriver Ride on attachments include hitch kit
- By maintaining line marking speed, LineDriver helps you produce a more consistent line thickness (film build) for more precise and longer-lasting stripes
- Exclusive Advanced Vibration Reduction System (patent pending) eliminates engine vibration while keeping line quality the best in the industry
- "No Maintenance" HydroStatic Pump System

To be used on LineLazer, ThermoLazer, GrindLazer.
