Short Description

Converts your Graco LineLazer line marking machine into a rideable unit which can double production and accuracy while reducing operator fatigue. Great for large jobs, big parking lots and road marking.

Description

The Graco Heavy Duty Line Driver with 200cc Honda Motor will transform your Graco line marker into a full ride on line marking system giving you the capacity to double and beyond your line marking production.

The Graco LineDriver HD can be coupled to all Graco LineLazer IV & LineLazer V push line markers such as the 3900, 5900, 130HS, 200HS and the new MMA200HS.

The reliability of the hydrostatic drive system is second to none, these machines will simply work for years without any issues. The hydraulic drive is controlled by the patented foot pedal system which can be operated with finite precision at low speeds.

The Graco LineDriver HD includes the coupling hitch to connect to your Graco LineLazer line maker and is easily installed in minutes with a few tools.

The Graco LineDriver HD can also be fitted with an AA Spray custom made [conditional registration roadpack](#) which includes LED amber beacon, rear lights, indicators and horn for conditional registration requirements throughout Australia.

Graco LineDriver HD 200cc Custom Line Marking Packages For City Councils -

AA Spray have specialised in Graco line marking equipment since 1993 supplying government and councils all over Australia. We can supply Graco line marking equipment with modifications such as conditional registration packs fitted for working on public roads and car parks.

We offer a full turn key system with delivery, on site induction which includes operation, basic up keep and workshop maintenance if required.

Contact AA Spray for your next line marking equipment requirements and we will tailor a package to suit your exact requirements.

Graco LineDriver HD Features -

- Goes forward up to 16 km/h!
- Reverse up to 10 km/h
- LED fold out driving light with switch
- 12 Volter battery located under the seat

- New “Cool Grey” operator seat - 20% cooler than black seats
- Dual Foot Pedal Controls
- 200cc Honda GX
- Up to 50% less pulling effort to start the engine – no more broken recoils
- All Graco LineDriver Ride on attachments include hitch kit
- By maintaining line marking speed, LineDriver helps you produce a more consistent line thickness (film build) for more precise and longer-lasting stripes
- Exclusive Advanced Vibration Reduction System (patent pending) eliminates engine vibration while keeping line quality the best in the industry
- “No Maintenance” HydroStatic Pump System
- “ALL -Terrain” smooth ride tires

To be used on LineLazer, ThermoLazer, GrindLazer.
