Product Images

Short Description

Graco Evenflow Pressure Roller Frame 305mm attaches to the Heavy-Duty Extension Pole to make pressure rolling easier.

Description

Graco pressure rollers are fitted to the end of a heavy duty extension pole that has 7/8" or G Thread connections. This roller frame requires an airless sprayer to supply paint via the paint hose and gun, generally you will need to turn the pressure down to approx 500psi because you are only feeding the roller frame with paint. Pressure frame is rated to 3600psi

The roller frame requires special perforated roller sleeves which have holes in the core of the nap to allow the paint to flow through. You can't use normal roller sleeves with this roller frame.

Graco produce three sizes of 305mm roller covers for use with this frame -

Part No. 186944 13mm Nap Roller Cover x 305mm/12" Wide

Part No. 186945 19mm Nap Roller Cover x 305mm/12" Wide

Please note - This roller frame does not include a roller cover.
