Graco Bluemax II 3300psi 3/16" Airless Paint Hose is a thinner, lighter and more flexible paint hose that comes standard with 1/4" Female x 1/4" Female NPT fittings.

Description

Graco Bluemax II 3300psi 3/16" Airless Paint Hose is a thinner, lighter and more flexible paint hose that comes standard with 1/4" Female x 1/4" Female NPT fittings.

3/16" airless paint hoses are designed to be fitted between an airless spray gun and the end of the standard paint hose from your machine to increase flexibility and reduce fatigue on the operator's wrist.

These hoses can also be used on very small airless sprayers as the main supply hose from the machine to the gun. Small machines like the Magnum and Merkur ES airless sprayers can work with a short 7.5m paint hose. This length is not suggested for any machine larger than a Graco 390PC or above.

Graco Bluemax II 3/16" Airless Paint Hoses Feature -

- Light weight and flexible - over 10% lighter weight and increased hose flexibility improves usability while spraying under pressure.
- Highest safety standards - conductive core meets the highest world-wide safety standards unlike competitive ground wire hose designs.
- Minimal hose coil memory - superior flexibility and reduced coil memory provides ease of use during coiling and uncoiling.
- Corrosion resistant - yellow zinc plated spring guards are more corrosion resistant.
- Available in a wide variety of lengths and diameters - 3/16 inch (4.8 mm), 1/4 inch (6.3 mm), 3/8 inch (9.5 mm).

Graco Bluemax II 3/16" airless paint hoses are available in the following sizes -

Graco Part No. 214981 – 3/16" x 15ft (4.8mm x 4.6m) Whip Hose 1/4" F-F

Graco Part No. 214698 – 3/16" x 25ft (4.8mm x 7.5m) Whip Hose 1/4" F-F

DO NOT apply thread tape to the fitting on your airless spray gun or joining nipple, airless paint hoses use seated fittings and **DO NOT** require thread tape. Using thread tape may cause damage to the fitting on the airless paint hose and will probably cause it to leak.
