Short Description

Atomex Disposable Spray Booth Filters are available in 1000mm, 900mm and 850mm Wide. Designed for open face and enclosed spray booths to trap overspray while exhausting clean air.

Description

Atomex Disposable Spray Booth Filters are an efficient method of removing atomised paint coating mist and particles before entering the exhaust stream of your spray booth.

Removing wet paint mist before entering your exhaust fan and duct will keep your spray booth clean, reduce overall maintenance and will remove potentially hazardous paint material from entering the atmosphere.

Disposable spray booth filter can be thrown into dry waste for cheap effective disposal.

Atomex Disposable Spray Booth Filters are available in the following sizes -

1000mm Wide Disposable Spray Booth Filter - Part No. AX/11-900-000

900mm Wide Disposable Spray Booth Filter - Part No. AX/11-900-001

850mm Wide Disposable Spray Booth Filter - Part No. AX/11-900-002

All Atomex Disposable Spray Booth Filters will expand to approx 10m long. The filter can be cut with scissors easily to reduce the length.
