Short Description

Binks Lid Mount air driven agitator is designed to fit onto a 20 litre drum cover. The agitator is set on an angle so that the propeller does not hit the side of the drum.

Description

Binks air driven paint agitators are designed for a wide variety of industrial and automotive applications. The agitators ensure paints and fluids are agitated precisely to keep paint solids in suspension and maintain optimum finishing characteristics.

Binks Lid Mount Agitator in Stainless Steel Features -

- Speed of propeller shaft is determined by fluid, 3000RPM maximum.
- Air supply to the motor should be 60 psi gauge pressure
- minimum.
- Recommended lubricant: SAE 10W non-detergent oil, 10-20 drops daily.
- For use with 20 litre drums or smaller that have lid covers. You may need to drill a hole into your existing lid to make this fit.
- Available in stainless steel and carbon steel models
- Does not include lid or drum cover.

Binks Part No. 41-3312 Agitator Drum Lid Mount Stainless Steel
