Short Description

Graco Triton 308 double diaphragm low pressure pumps are an air-operated diaphragm spray package that applies a high quality, decorative finish to wood and metal parts. It is a more effective alternative to traditional pressure pots and standard diaphragm pumps.

Description

Graco Triton 308 double diaphragm packages are available in a number of configurations including stand mount, trolley mount, pail or drum mount and wall mounted.

All Triton pump packages include an AirPro 1.4mm Conventional Pressure Feed Gun and 7.6m twin air and fluid hose.

Triton 308 Low pressure double diaphragm packages are designed for high volume applications where the paint material can be drawn directly from a 15 litre or 20 litre drum which allows the operator to spray continuously.

The fluid hoses are a standard double diaphragm/pressure pot hose with a 3/8" fitting for the fluid and 1/4" fitting for the air. The Triton 308 pump can be also used with any conventional, HVLP or compliant pressure feed spray gun such as the DeVilbiss Advance HD if higher quality paint finishes are required.

Graco Triton 308 Double Diaphragm Pumps Feature -

- Supplies up to 35% extra air flow to gun for superior atomization
- Saves material and time during flushing, priming and colour changes
- Delivers a consistent spray pattern and uniform film thickness
- Sprays a wide variety of material viscosities
- Reduces operator fatigue

Typical Applications

- Joinery/Furniture & Woodworking
- Aerospace / Aviation
- Agricultural & Off Road Vehicles
- Marine Industry
- Truck/Trailer & Chassis Makers
- Rail, Bus & Transport
- Plus many others...

Suitable For These Materials

- Wood-Stains, Lacquers & Varnishes
- Primers, Sealers & Catalyzed Lacquers
- Solvent OR Waterborne Coatings
- Adhesives & Fillers
- Plus many others..

Graco Part No. 233482
