Product Images

Short Description

Graco Line Marking Automatic Airless Spray Guns are available in single acting & double acting versions, predominately used for line marking trucks, Graco Roadlazer & Graco RoadPak series line markers.

.

Description

The Graco Line Marking Automatic Airless Spray Guns are available in single acting & double acting versions. These guns have larger material passages in the diffuser than the standard Graco Hydra Automatic Airless Spray Guns which allow higher fluid flow, this is useful when using larger truck mounted line marking pumps such as the Duraflo 2400.

The Graco Line Marking Automatic Airless Spray Gun can be used in circulating and non-circulating systems, the head on the gun has a 3/8" port with plug which can be removed for use in circulating fluid systems. Please note that this gun does not include a spray tip but does include a RAC 5 orange spray tip guard.
