Short Description

Graco Line Marking Automatic Glass Bead Guns are available in single acting & double acting versions, predominately used for line marking trucks, Graco Roadlazer & Graco RoadPak series line markers.

Description

The Graco Line Marking Automatic Glass Bead Guns are available in single acting & double acting versions. Designed for use with line marking trucks to deliver a higher flow rate of glass bead ensuring that enough bead is applied to the wet painted line.

These guns are also used on the Graco Roadlazer and RoadPaks that are fitted with the pressurized bead option.

Graco automatic glass bead guns include four valve seats –

- Graco Part No. 17V103 – 0.170 Valve Seat (4.3mm)
- Graco Part No. 238666 – 0.234 Valve Seat (5.94mm) Standard size
- Graco Part No. 238664 – 0.284 Valve Seat (7.13mm)
- Graco Part No. 238665 – 0.344 Valve Seat (8.73mm)

The bead deflector or duck bill at the end of the gun is 88mm wide and can be adjusted to narrow the flow of the glass bead if desired.
