## Product Images

## Short Description

Conditional Registration Pack to suit Graco Heavy Duty Line Driver includes LED amber beacon, rear lights, indicators, stop lights & horn. This item is only supplied when purchasing a Graco Heavy Duty Line Driver from AA Spray.

## Description

---

AA Spray conditional registration packs are designed for Graco Heavy Duty Line Drivers when used on public roads and work sites. Conditional registration in all states of Australia will require at least the following items fitted for compliance –

- Flashing Amber Beacon
- Rear Lights
- Rear Indicators
- Rear Number Plate Light
- Stop Lights
- Control/Switch Box

AA Spray can build any customised road pack for conditional registration to suit not only the Graco Heavy Duty Line Drivers but also Graco LineLazer V push line markers and 250SPS/250DC LineLazer V self propelled ride on line markers.

All components used in conditional registration packs are high quality and weatherproof with powder coated frames and removable LED beacon mast. Please note, we no longer supply Heavy Line Driver road packs with fold down amber beacon masts, these have proved dangerous and caused injuries when the locking pins have not been replaced correctly. Removable amber beacon masts are a safer option.

The price of this package includes fitting when purchasing a [Graco Heavy Duty Line Driver](#) from AA Spray.

We can fit conditional registration packs to your Graco Heavy Duty Line Driver but additional charges will apply.

This item is not available for separate purchase and will not be shipped, it will only be supplied as an ad-on when purchasing the [Graco Heavy Duty Line Driver](#).
