Short Description

Ransburg 80558-10 electrostatic grounded air hose 10m with left hand fitting is designed for Ransburg Ransflex RFX & RFXi electrostatic guns with screw on air fitting.

Description

Ransburg 80558-10 electrostatic grounded air hose 10m with left hand fitting is designed for Ransburg Ransflex RFX electrostatic spray gun with screw on air fitting.

Grounded air hoses are specially designed for electrostatic spray guns that use air turbines to generate the charge to the electrode such as the Ransburg Ransflex RFX and RFXi.

This 10m grounded air hose has a 1/4" left hand threaded connection to connect to the spray gun and a 1/4" standard BSP connection with grounding cable to connect to your air supply and grounding point.

Care should be taken with electrostatic grounded air hoses because they have a wire running through the hose from each end to ensure the fittings are conductive.

Ransburg 80558-10 10m Grounded Air Hose Features -

- 1/4" BSP Left Hand Fitting - Gun connection
- 1/4" BSP standard fitting - Air supply connection
- Soft flexible solvent resistant hose

Ransburg Part No. 80558-10
