Short Description

Ransburg 80558-16 electrostatic grounded air hose 15m with QD (Quick Disconnect Fitting) is designed for Ransburg Ransflex RFX electrostatic gun with QD fitting on the air inlet.

Description

Ransburg 80558-16 electrostatic grounded air hose 15m with QD (Quick Disconnect Fitting) is designed for Ransburg Ransflex RFX electrostatic gun with QD fitting on the air inlet.

Grounded air hoses are specially designed for electrostatic spray guns that use air turbines to generate the charge to the electrode such as the Ransburg Ransflex RFX and RFXi electrostatic spray guns.

This 10m grounded air hose has a QD connection to connect to the spray gun and a 1/4" standard BSP connection with grounding cable to connect to your air supply and grounding point.

Care should be taken with electrostatic grounded air hoses because they have a wire running through the hose from each end to ensure the fittings are conductive.

Ransburg 80558-16 15m Grounded Air Hose Features -

- QD (Quick Disconnect) - Gun connection
- 1/4" BSP standard fitting - Air supply connection
- Soft flexible solvent resistant hose

Ransburg Part No. 80558-16
