

## Description

---

Atomex GM-20E diaphragm seal kit includes all seals used in the suction valve, outlet valve, prime spray valve and pusher valve.

We recommend to purchase a new diaphragm seal kit when replacing the pump head assembly.

When replacing the diaphragm, unscrew the lock nut from the old diaphragm, remove the spring and a diaphragm support, refit the support and the spring, then screw the lock nut back onto the diaphragm stem until the top of the lock nut is flush with the end of the diaphragm stem.

### **This part will suit the following model airless sprayers -**

- Atomex GM-20E Airless Sprayer

Atomex Part No AX/GM-20103A
