## Short Description

Wagner HEA Pro Airless Spray Tips offer finer coatings with less over spray while spraying at half the pressure than normally required.

## Description

---

Wagner's patented HEA tip technology starts with a Pre-Tip, which is positioned in front of the actual atomization tip (Finish Tip). This Pre-Tip atomises the material being sprayed at the same delivery volume and working speed found in traditional airless devices. The structure of the tip creates a very soft, feathered spray pattern.

The result is better coverage of overlapping strokes, less paint build-up at the start and end of pass and an overall better surface quality. This makes the HEA tips particularly easy to use, saves on material and ensures a perfect result.

### **ADVANTAGES OF WAGNER HEA PRO TIP TECHNOLOGY:**

#### **Less Overspray**

Reduced pressure leads to:

- A softer and more controllable spray pattern
- Up to 55% less overspray

#### **Maximum Control**

- The system is now much easier for beginners to handle due to a lower particle velocity and slightly larger spray droplets

#### **Effortless Spraying**

- Lower pressure means minimal gun recoil and lighter trigger pull

#### **Longer Life**

- Lower pressure means less wear and tear on the system and its components

Comes with matching gun filter and double seal.
