Short Description

Atomex 4" Safety Air Blow Gun with reduced blast is designed for delicate blowing applications or in a workshop environment where high pressure air blasting has been identified as a "risk".

Description

Atomex 4" Safety Air Blow Guns are a special purpose air blow gun designed for delicate blowing applications and also designed to reduce possible injury to an operator by limiting the blast of air that comes from the nozzle. The nozzle has a small hole near the end that reduces the overall air pressure that leaves the nozzle.

Atomic 4" Safety Reduced Blast Air Blow Gun Feature –

- Low blowing pressure less than 30psi.
- Bent nozzle for greater access and reduction of fatigue

Atomex Part No. AX/14-960-100
