## Product Images

## Short Description

Wagner Trade Tip 3 Fine Finish Reversible Spray Tips. Designed to slow down the fluid flow while give finer atomisation of the paint for higher quality finishes.

## Description

---

The fine finish tip uses a pre-atomising process which slows down the speed of the paint to provide more control, less overspray and superior finish.

With a double special core for ultra-fine droplet formation, this tip will achieve incredibly high quality surface sprayed finishes.

Fine finish tips offer optimal atomisation even in the low pressure ranges and is ideal for particularly high grade finishes. The spray pattern of fine finish tips provides soft run-out at the edges of the spray fan to ensure smooth even coating at the high level possible.

Wagner spray tips are extremely durable manufactured from carbide and stainless steel to reduce wear and enable constant spray angle.

Wagner TT3 Fine Finish Spray Tips are pressure rated to 5000psi.
