

Pilot Air Drain Valve For Air Receivers

\$25.85
INCL. GST

Product Images

Short Description

Pilot Air Drain Valves are used to drain condensate (water) from air receivers (air tanks). Available in 1/4" BSP and 3/8" BSP for larger air receivers.

Description

Air compressor receivers (air tanks) need to be drained daily to remove water, often people neglect this and find the drain valve has seized and it can no longer be opened.

Always read the manufacturers instructions before fitting and be sure to relieve air from the tank and turn the air compressor off.

Pilot Air Drain Valve For Air Receivers are available in two sizes –

1/4" BSP Drain Valve Part No.PA/04-14DR

3/8" BSP Drain Valve Part No.PA/04-38DR

AA Sprays holds a full range of Pilot Air Compressors & spare parts with fast delivery Australia wide.
