

# BondLoc B567 Stainless Steel Pipe Sealant

**\$24.00**  
**INCL. GST**

## Product Images

## Short Description

BondLoc B567 is an easy to break sealant and locking action product that gives an instant seal to low pressures. Fast fixture times are found on a range of materials such as copper, mild steel and other metals. Cold temperatures will slow the cure but not the instant seal.

## Description

BondLoc B567 is an easy to break sealant and locking action product that gives an instant seal to low pressures. Fast fixture times are found on a range of materials such as copper, mild steel and other metals. Cold temperatures will slow the cure but not the instant seal.

BondLoc range of anaerobics include threadlockers, pipesseals, gasket grades and retaining compounds to suit a wide range of automotive, agricultural, industrial and precision engineering applications.

B567 is a high performance anaerobic that locks and seals metal, tapered pipe threads and fittings like those found on air compressors. It's ideal for stainless steel, aluminium, galvanised metal and other inert materials.

Manufactured in the UK.
