Short Description

Nitto Paint Cupla is designed for quick connection and disconnection of paint spray gun fluid hoses used with low pressure paint tanks.

Description

Nitto Paint Cupla series are useful for quick changing of low pressure air spray guns. The unique design allows the paint gun to be disconnected from the fluid line rather than the traditional unscrewing of the hose.

These fittings can not be used with airless spray guns.

Nitto Paint Cupla Series feature –

- Unique swing connection system enables easy connection and disconnection of paint spray gun and paint hose even by gloved hands.
- Full-open gate valve mechanism prevents paint precipitate build-up.
- Small and lightweight design reduces the weight to be held by hand of operators.
- For transfer of various paints and thinners

Nitto Part No. PE-3P-G
