Short Description

Superior Quality Atomex X-75HD Heavy Duty reversible airless spray tips are made in the USA using the hardest tungsten carbide in the industry. Ideal for harsh protective coatings and pressure rated to 7500psi.

Description

Atomex X-75HD Heavy Duty airless spray tips are made from the hardest tungsten carbide in the industry formulated to a Rockwell Hardness of 93 – a diamond's hardness is 100. We guarantee the longest tip life and superior pattern in the industry.

The Atomex X-75HD Heavy Duty airless spray tips are designed to be used with large air driven airless sprayers that spray anywhere between 5000psi – 7500psi. These tips can also be used with electric and petrol contractor airless sprayers for professional high quality paint spray finishes.

Fan Width - Centimeters

Seal alignment, the patented tip seal has a square opening that fits on the end of the tip handle. This unique feature allows you to easily insert the seal into the guard. Then simply twist the tip handle to line up the seal cavity accurately to receive the tip shaft. Quick accurate installation every time!

Atomex X-75HD Heavy Duty Reversible Airless Spray Tip Features -

- 7500psi Pressure Rating
- Interchangeable with most brands
- Mega-Hard Tungsten Carbide
- Patented tip seal design
- Solvent proof seal
- Australia's largest range of tips in stock
- Made in the USA
