Product Images

Short Description

Stainless steel ball valves are suitable for a wide variety of air, gas, oil and water applications. Two piece design in 304 stainless steel provide leak proof isolation, hard wearing and long lasting.

Description

Stainless steel ball valves are a two piece full bore design for maximum air and liquid flow, constructed in 304 grade stainless steel with PTFE seals for leak-proof isolation.

Stainless steel ball valves are commonly used in compressed air & water pipe systems for isolation purposes. 304 stainless steel is highly resistant to oxidation and corrosion making these ideal for use on compressed air piping systems.

Stainless Steel Ball Valves feature –

- WOG - Suitable for water, oil & gas applications
- Long lasting and hard wearing
- PTFE seals for leak-proof isolation
- Full range of sizes and types available
- 1000psi Working Pressure
-

Part No. AX/12-600-106
