

Atomex 5000psi 10 Port Fluid Manifold 1/2" x 3/8" NPT

\$430.06
INCL. GST

Product Images

Short Description

Atomex 5000psi 10 Port Fluid Manifold is designed for line marking trucks distributing multiple paint hoses to automatic and manual paint spray guns. Includes 2 x 1/2" NPT Female ports with 8 x 3/8" NPT Female ports for paint hose distribution.

Description

Atomex high pressure fluid manifolds are designed specifically for line marking truck applications, each end of the manifold has a large 1/2" NPT female port for recirculation and 8 x 3/8" NPT female ports (four on each side) for distribution of paint hoses to the automatic paint spray guns.

These manifolds are large enough to fit high pressure ball valves into each of the 3/8" NPT female ports and are spaced well enough so that ball valves will not hit another ball valve when being fitted.

Atomex 5000psi 10 Port Manifold dimensions & specifications-

- Length 323mm
- Width 83mm
- Height 60mm
- Weight 11.30 Kg
- Mounting Holes 4 Holes @ 11mm ID
- Pressure Rating 5000psi
- Material Construction Carbon Steel (Blackened)

Atomex Part No. AX/04-910-020

AA Spray supply a full range of line marking truck equipment with fast deliveryAustraliawide.
