sizes. Air filter/regulators will control compressed air pressure and reduce water in your air supply.

## Description

---

Compressed air filter/regulators are commonly used on portable air compressors to reduce condensate and control the air pressure. The most common size for use with portable air compressors is 1/4" BSP but if you intend to use a filter/regulator on a compressed air system such as pipes fitted to the wall of a factory you should consider larger port sizes to allow for the air flow.

Atomex Air Filter/Regulator will assist in reducing dust, oil & water down to 20 micron.

Atomex Air Filter/Regulator With Mounting Bracket & Gauge feature -
