Short Description

IFS 63mm Bottom Entry Liquid Filled All Stainless Steel Pressure Gauges are suitable for air and compatible

gases, widely used with air compressors & compressed air applications. Available in various pressure ranges for different applications.

Description

IFS all stainless steel liquid filled pressure gauges can be used in corrosive and saltwater environments where a normal gauge may not stand up in such conditions. These are a full stainless steel internal and external pressure gauge.

Liquid filling protects the internals of a gauge from corrosive atmospheres and dampens the effect of vibration and pulsation. Liquid filled gauges are often used on pump, water blaster and airless sprayers.

Liquid filled gauges must be installed in a vertical position so that the rubber bung is at the top. After installation the rubber bung should be pierced with a pin or similar implement to allow the gauge to breath. Leaking during transport caused by heat and elevations may occur with liquid filled gauges.

All IFS gauges are bourden tube type industrial grade suitable for most industry applications.

IFS 63mm Bottom Entry All Stainless Steel Pressure Gauge features -

- All Stainless Steel Components
- 1/4" BSP Stainless Steel threads
- Various pressure ranges available
- Dual scale dial in KPA & PSI
- +/- 2% Accuracy
- Glycerine Liquid Filled
