Short Description

Iwata AF2109 Air Fed Mask Kit With Belt, Regulator, Filter & 10m Air Breathing Hose includes nape cover and storage bag. The Iwata full face air fed masks features replaceable visor, headband, face seal with superior comfort and vision.

Description

Iwata air fed masks have developed for the professional automotive refinisher with advance design features to ensure comfort, functionality and superior vision while offering air breathing protection compliant with Australian/New Zealand Standard 1716-1994.

Iwata AF2100 Air Fed Mask Kit includes –

- Complete mask assembly with nape cover
- Waist belt, regulator and filter with pre-set air pressure
- 1.2m flexible whip hose for air supply to the spray gun
- Plastic storage bucket
- 10m yellow air breathing hose with fittings

Air fed breathing masks must be supplied with filtered compressed air to remove oil, water and contamination using a two stage, three stage or four stage filter system such as the Iwata CFRB & CFRCB. Air must be supplied from the filters to the mask waist belt using only air breathing hose compliant with Australian Standards.

Iwata Air Fed Masks feature –

- The AF2100 Air Fed mask is a Class LDH3 safety device which provides a protection factor of 200 times the occupational exposure limit.
- All Anest Iwata air fed masks are fitted with double action safety couplings to prevent accidental disconnection of the air feed line to the mask.
- The AF2100 Air Fed mask features a replaceable visor cover, which allows a panoramic view for the user. The floating headband has four adjustment points, with front and rear adjustment, for superior user comfort. The face seal and sweat band are replaceable for added hygiene.
- Other features include a visual air supply indicator located within the user's peripheral vision—allowing the user to ensure that air is being supplied at all times.
- The AF2100 is supplied with a waist belt and pre-set air regulator that meets the requirements of AS/NZS1716. The belt includes a pliable bracket that moulds to the user's body contour and has a quick release buckle, for ease of fitting.
- The unit also comes with a neck and shoulder cover, to provide full protection for the user's head.
- A 1.2 metre flexible gun whip hose, with ultra light fittings, comes with the unit, to provide enhanced spray gun manoeuvrability.

Iwata Part No. C/AF2109
