Short Description

Martech 75502 QABS Panel Mounted System 50 with Alarm is a ready to go 4 stage filter system for air breathing and automated monitoring with 90dB alarm.

Description

The Martech 4 Stage Air Breathing Filter System is designed for maximum air breathing quality. This clever filtration system makes use of four filters to remove dangerous air contaminants such as moisture, oil vapour, gaseous hydrocarbons, dirt, rust & scale with an automatic moisture drain and air regulator for precise pressure control.

The Martech QABS Panel Mounted System 50 features continuous monitoring of air pressure and quality with 90dB loud alarm making this ideal for critical air breathing applications.

Martech 75502 QABS Panel Mounted System 50 features -

- Easy installation, simply locate on booth wall and attach airlines
Expandability; can support multiple users with the addition of a manifold block up to 50 cfm air usage
- Low Maintenance with minimal downtime and costs
- Automated Moisture Discharge to ensure air supply remains dry reducing operator & equipment wear & tear
- Continuous Monitoring; the in line continuous monitor ensures that the supplied air meets the required OHS quality and provides immediate notification should the air fail these standards
- Multiple Function Monitoring; not only monitors air quality but also that sufficient air flow exists providing an increased level of safety
- Alarmed; when activated the alarm reaches 90db, allowing it to be used in a wide range of industrial environments.
- Four Stage Filtration; increased filtration means better quality of air, safer for your employees
- Replacement Filters; minimal ongoing maintenance, replace these on a 3, 6 or 12 monthly basis reducing cost and downtime
- NIOSH Approved; Martech systems are designed to comply with the requirements of the internationally recognised NIOSH standard meeting current legislation

Replacement Filters -

- 11 Filter Pack (12 Months Usage) Part No. C/85890

Air fed breathing masks must be supplied with filtered compressed air to remove oil, water and contamination using a two stage, three stage or four stage filter system such as the Iwata CFRB & CFRCB. Air must be supplied from the filters to the mask waist belt using only air breathing hose compliant with Australian Standards.

Iwata Part No. C/75502

AA Spray stock a full range of Iwata Air Fed Masks including tear off visor covers, belt filters and replacement activated carbon filters with fast delivery Australia wide.
