Short Description

Atomex 10" Composite Air Blow Gun features a non-scratch nozzle useful for spray painting applications to prevent accidental damage to the surface. Super strong concentrated air flow makes this ideal for most workshops.

Description

Atomex 10" Composite Air Blow Gun features a non-scratch nozzle useful for spray painting applications to prevent accidental damage to the surface. Super strong concentrated air flow makes this ideal for most workshops.

Atomex 10" Bent Nozzle Composite Air Blow Guns are very durable and long lasting compared to conventional plastic air blower duster guns.

Atomex 10" Bent Nozzle Composite Air Blow Gun Feature -

- Light weight and very strong composite material construction.
- Composite trigger valve reduces wear and corrosion.
- Blower will not "hiss" when not in use.
- Blower is almost impossible to break under "fair wear" conditions
- 230psi maximum air pressure rating
- Non-scratch nozzle
- Super strong concentrated air flow from the nozzle
- Ideal for workshops and spray painting applications

If you are sick and tired of cheap nasty air blowers that break at the trigger when dropped and constantly "hiss" air through the end of the nozzle then get one of these.

Atomex Part No. AX/14-960-102
