guns. Removes water, dirt and oil from your compressed air supply.

Description

Disposable inline compressed air moisture filters will fit all brands of gravity, suction and pressure feed spray guns. Removes water, dirt and oil from your compressed air supply.

Disposable Inline Compressed Air Moisture Filter features –

- Removes water, dirt & oil from compressed air.
- Will fit on to all brands of air spray gun
- Strong ABS plastic design
- 1/4" BSP female outlet & 1/4" BSP male inlet
- Maximum air flow 15cfm
- Maximum working pressure 70psi

How long do these filters last?

The manufacturer recommends that these should be changed every week when used in a spray painting shop to ensure that no moisture passes through the spray gun.

Factors such as the size of the air compressor, air receiver and existing moisture prevention systems such as refrigerated air dryers and water traps etc... will impact air quality.

Considering all of these factors it is impossible to guess how long a filter will last. The small price for a disposable inline compressed air moisture filter can easily be justified against the time taken in preparation and cost of materials.

Atomex Part No. AX/14-950-000
