

# IP-01 (1:1 Ratio) Stainless Steel Transfer Pump

**\$2,532.51**  
**INCL. GST**

## Product Images

## Short Description

IPM's IP-01 series of pumps are general purpose transfer pumps designed for use with a wide variety of materials. The air driven motor is designed with simplicity in mind for years of use in less than desirable conditions.

## Description

---

International Pump Manufacturing (IPM) produce class leading drum mounted transfer pumps that are manufactured to the highest quality in the USA.

The IP-01 is designed to fit a standard 205 litre drum and will screw directly into the bung hole keeping the transfer pump secure and sealing the drum from outside contamination.

### Features –

- Fully air operated.
- 2 ball piston design provides uniform positive displacement.
- Extremely durable pump with long life packing.

### Typical Applications –

- Transfer from drum to day tank Continuous or dead end transfer
- Low viscosity spray adhesive
- Supply pump for air spray and HVLP (high volume low pressure) spray.
- Applications of coatings and wood finishing materials.
- Spray painting machineries.
- Fabricated plastic products.
- Automotive, truck and bus refinishing and components.
- Business machines and computer cabinet.
- Fabricated metal products.
- Wood furniture, cabinets and other wood products.

### Typical Fluids Handled –

- Anti-freeze
- Windshield washer solvent
- Automatic transmission fluid
- Motor and hydraulic oil
- General chemicals
- Thinners and solvents
- Light viscosity coatings (primers, stains, enamel, alkyd & acrylic paints)
- Spray adhesives and finishes
- Solvent based paints
- Water based paints (SST models)
- Metallic paints
- Mould release compounds
- Lacquers
- Vanishes
- Ceramic glazes
