Short Description

Atomex Adapter Nipple 1/8" BSP x 1/4" NPT male thread is used for connecting the Macnaught KY Supergrip Coupling to an airless paint spray hose with 1/4" NPT thread for injecting resin.

Description

Atomex Adapter Nipple 1/8" BSP x 1/4" NPT male thread is used for connecting the Macnaught KY Supergrip Coupling to an airless paint spray hose with 1/4" NPT thread for injecting resin.

Rated to 7250psi this hose fitting should have thread tape on the 1/8" end when connecting to the Macnaught KY Supergrip coupling but does not require thread tape on the 1/4" NPT end when connecting to a paint hose.

The use of grease coupling with Injection packers are designed for professional use only. Do not attempt high pressure resin injection unless you are suitably qualified or experienced.

Atomex Part No. AX/17-100-106
