Description

Wagner 0580402A Control Pro Pressure Gauge can be used with Control Pro 150, 250 & 350 airless sprayers. Control Pro Airless Sprayers have a unique hose & gun thread size compatible only with Wagner Control Pro.

This pressure gauge can NOT be used with any other model airless sprayer, it will only work with Wagner Control Pro airless spray guns and hoses. If you have any other model of Wagner airless sprayer we suggest to purchase [0580495](#) Wagner HEA Pressure Gauge and T-Piece which works with standard airless 1/4" npt fittings and hoses.

Do not apply thread tape to the fittings, the fittings are designed to be tightened using two wrenches or spanners.

Fitting a pressure gauge to your Control Pro Airless Sprayer allows you to precisely adjust the spray pressure. This is useful when spraying with different sizes of spray tip, reducing the pressure where possible will help eliminate over spray and apply a better finish coat.

Wagner 0580402A Control Pro Pressure Gauge can be used with the following models -

- Wagner Control Pro 150
- Wagner Control Pro 250
- Wagner Control Pro 350
-

Wagner Part No. 0580402A
