Short Description

Thermobond HRC is an Ultra Premium water based 100% acrylic high build, high solids, highly reflective roof coating which can be used on asbestos, tile and metal roofs. Thermobond HRC does not allow the passage of heat from the sun to reach the substrate thus significantly reducing interior temperatures.

Thermobond Heat Reflective Coating

Shieldcoat Thermobond HRC is an Ultra Premium water based 100% acrylic high build, high solids, highly reflective roof coating. Thermobond HRC does not allow the passage of heat from the sun to reach the substrate thus significantly reducing interior temperatures.

Shieldcoat is ideally suited to withstand the harsh weather conditions typically experienced in the southern hemisphere. Thermobond HRC will coat and protect all roof substrates from the extreme heat and storms of a northern summer, to the freezing cold of a southern winter. Thermobond HRC will beautify and protect your most valuable asset for many years to come.

Shieldcoat Thermobond has been engineered to significantly reduce the accumulation of dirt and protect from the chemical attack associated with pollution.

Thermobond HRC Specifications -

- Size: 15L
- Colours: 15 White and pastel colours only
- Optimum Colour: Arctic White
- Finish: Gloss
- Touch Dry: 30 minutes

Cloudy Quarter

Cloud 9

Classic Cream

Fantan

Heirloom

Essential White

Snowfall

Surfmist

Trader Half

Bright White

Bright On White

Arctic White

Modern White

Modern White Quarter

Silence

Arctic White is the optimum roof colour for heat reflective coatings.

Shieldcoat Thermobond is so effective at reflecting heat that the underside of a metal roof with Thermobond applied will feel cool directly under the sunlight on the hottest Australian day.

For professional use only, please read data sheet prior to application.
