- Standard fluid tip/nozzle size 2.0mm
- Optional fluid tip/nozzle size 2.2mm

Typical Applications -

- Furniture Industry
- Kitchen Manufacturing

- Upholstery - Automotive/Commercial

Advantages -

- Pump fits into a 205 litre drum.
- System does not require cleaning.
- Fast application for high volume production.
- Suitable for spraying a wide variety of contact adhesive.
- Stainless Steel pump for long life and no corrosion.
- DeVilbiss Advance HD Spray Gun produces perfect cob webbing.
- DeVilbiss quality spray gun manufactured in the UK.
- Low maintenance pump manufactured in the USA.
- Package will last for many years giving high ROI.

Handy hints -

- Shut off air supply with the ball cock when not in use.
- Remove and clean the gun air cap, nozzle and needle periodically.
- Replace air/fluid hose every two years or if damaged.
- Replace gun fluid tip and needle every three years or if damaged.
- Do not drop the spray gun to avoid damage to the air cap.

205 Litre Drum Mounted Contact Glue Spraying Package is ready go when delivered, set up time is under five minutes. Simply screw on the air regulator, connect the air/fluid hose set to the pump and gun and then connect your compressed air hose to the system. The pump has been flushed with thinners prior to delivery to avoid manufacturing grease, oil and contaminants ruining your glue.

This package is not suitable for adhesives or glue that contain sand, grit or abrasive content. If you are unsure please email a data sheet of the product you intended to spray and we can assist.
