Short Description

Graco Ultra Handheld Airless Sprayers are the perfect tool for touch ups or small jobs for situations where you just don't want to use your larger airless sprayer. This compact light weight sprayer will deliver a professional spray finish and take a fraction of the time to start-up and clean up.

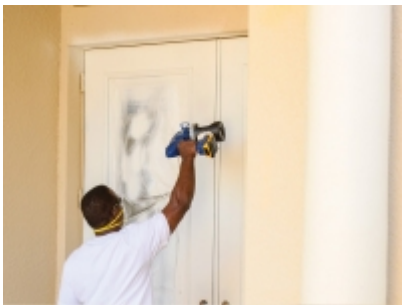

Description

Whether you're a professional painting contractor, handyman or even a D.I.Y. home renovator, the Graco Ultra Handheld Airless Sprayer is an essential part of your tool kit.

The Graco Ultra Handheld is designed specifically for smaller jobs and touch ups. The compact size and ease of use makes it a great tool to use when you just don't want the trouble of setting up your larger airless sprayer but want the application speed and professional finish.

These units will spray acrylic water based paint products like ceiling flat, low sheen and high gloss finishes but are not designed for solvent or oil based paints. The FlexLiner Bag System allows you to spray at any angle and makes clean up effortless.

The Graco Ultra Handhelds feature the new Graco FFLP Tips (Fine Finish Low Pressure) which dramatically reduces overspray while delivering a perfect finish.

Adjust motor speed to spray at virtually any speed that the job demands, more control allows users to spray at the speed they choose - a professional finish, fast or slow.

Graco has designed the new Triplex Pump system to be easily replaced, once your pump is worn out simply remove the casing screws, replace the pump and re-fit the casing screws in just a few minutes.

Graco Ultra Handheld Airless Sprayers are made in the USA.
