Short Description

The Atomex GM-60E Electric Concrete Injection Crack Repair Pump package has been adapted for single pack

water reactive polyurethane crack injection material. The slim-line compact frame design is ideal for getting this machine into tight access areas such as basements and lift shafts.

Description

The Atomex GM-60E Electric Concrete Injection Crack Repair Pump package has been adapted for single pack water reactive polyurethane crack injection material. The slim-line compact frame design is ideal for getting this machine into tight access areas such as basements and lift shafts.

The Atomex GM-60E Electric Concrete Injection Crack Repair Pump is a hydraulic diaphragm pump that is widely used for concrete crack injection with single pack injection materials. The simple mechanical design makes this machine ideal as the pressure can be adjusted from 0-3000psi giving you precise pressure control without any pressure fluctuation. The working parts can easily be removed for cleaning after each job and the 6 litre plastic hopper with lid protects the material from water splash or drips from above.

The simple mechanical design of this airless sprayer does not rely on computers or microprocessors making this a very reliable and robust concrete injection machine. This machine is designed for single pack standard water reactive polyurethane crack injection material. Please contact our office before purchasing this machine to ensure that the material you intend to use is compatible with this machine

Atomex Crack Repair Pump Package Includes :

The Atomex GM-60E comes standard with 6 litre paint hopper, 4.5m paint hose, high pressure ball valve and injection coupling. We can change the configuration of the hose (including length), ball valve and coupling to suit individual requirements, please just ask.

Atomex Crack Repair Pump Package Includes features:

- Strong chrome plated frame with folding handles
- Rugged "one piece hub" semi-pneumatic tyres
- No electronics, sensors or microprocessors to fail
- Can be run on a 3.5kva generator or larger
- Pump will support 45m of paint hose for greater access
- Large hose hooks that will hang 30m of paint hose
- 25 Months Warranty for commercial use
- Simple mechanical pump designed that has been used for over 35 years
- Atomex is Australian Owned

Atomex Part No. AX/0B-GM-607
