Product Images

Short Description

The Atomex GM-70G Petrol Concrete Injection Pump package has been adapted for single pack water reactive polyurethane crack injection material. The versatility of the Honda GX-160 Petrol Motor is great for injection applications where electricity is not available.

Description

The Atomex GM-70G Petrol Concrete Injection Pump package has been adapted for single pack water reactive polyurethane crack injection material. The versatility of the Honda GX-160 Petrol Motor is great for injection applications where electricity is not available.

The Atomex GM-70G concrete injection pump is a hydraulic diaphragm pump that is widely used for concrete crack injection with single pack injection materials. The simple mechanical design makes this machine ideal as the pressure can be adjusted from 0-3000psi giving you precise pressure control without any pressure fluctuation. The working parts can easily be removed for cleaning after each job and the 6 litre plastic hopper with lid protects the material from water splash or drips from above.

Using an Australian compliant genuine Honda GX-160 petrol motor The simple mechanical design of this airless sprayer does not rely on computers or microprocessors making this a very reliable and robust concrete injection machine. This machine is designed for single pack standard water reactive polyurethane crack injection material. Please contact our office before purchasing this machine to ensure that the material you intend to use is compatible with this machine

Atomex GM-70G Concrete Injection Pump Package

The Atomex GM-70G comes standard with 6 litre paint hopper, 4.5m paint hose, high pressure ball valve and injection coupling. We can change the configuration of the hose (including length), ball valve and coupling to suit individual requirements, please just ask.

The Atomex GM-70G Concrete Injection Pump features:

Strong chrome plated frame with folding handles

Rugged "one piece hub" semi-pneumatic tyres

No electronics, sensors or microprocessors to fail

Pump will support 45m of paint hose for greater access

Large hose hooks that will hang 30m of paint hose

25 Months Warranty for commercial use

Simple mechanical pump designed that has been used for over 35 years

Atomex is Australian Owned
