Short Description

Pilot Air K17T 415 Volt Air Compressor is ideal for static workshop applications where 415 Volt or three phase power is available.

Description

Pilot Air K17T 415 Volt Air Compressor is ideal for static workshop applications where 415 Volt or three phase power is available. The K-17T is the smallest of the three phase range but is built tough here in Australia for reliability and longevity.

Please be aware before purchasing a 415 Volt Air Compressor that you will need to install a dedicated power circuit. Check with our office for the exact requirements of the circuit needed for the model chosen.

We also recommend the use of a refrigerated air dryer with filters to ensure that you achieve the very best air quality. Refrigerated air dryers will remove water from your air supply which can damage air tools and other air equipment. Speak to our staff for the right advice.

Pilot Air Compressors are the benchmark for quality and reliability in Australia.

This item is excluded from free delivery, please contact our friendly customer service on 02 9644 1040 or info@airless.com.au for shipping quotation.

Pilot Air K17T 415 Volt Air Compressor Features –

- Australian built – Pilot Air's seal of quality
- Ideal for workshops or factories
- Twin cast iron cylinder, Italian made pump
- High performance, heavy duty component – ensures reliability
- Energy efficient MEPS approved electric motors – minimize energy costs
- Air receiver to AS1210-3 – suits workplace use
- Three year compressor pump warranty
- Performance measured to AS4637
- Technical data conforms to +/-5%.
- Does not include a filter/regulator
