

# Pilot Air K100 415V Air Compressor

**\$16,007.49**  
**INCL. GST**

## Product Images

## Short Description

Pilot Air K100 415 Volt Air Compressor is ideal for static workshop applications where 415 Volt or three phase power is available. Suited for car mechanical workshops with 5 or more work bays or large smash repair shops.

## Description

Pilot Air K100 415 Volt Air Compressor is ideal for static workshop applications where 415 Volt or three phase power is available. The K100 is built tough here inAustraliafor reliability and longevity. This is the ideal size three phase air compressor for mechanical workshops, large smash repair shops or any workshop that requires free air delivery up to 67.6 CFM.

The Pilot Air K100 is the largest piston reciprocating air compressor available, ideal for large workshops due to the low service cost associated with piston air compressors. The need only replacement air cleaners and oil which we recommend to replace every six months.

Please be aware before purchasing a 415 Volt Air Compressor that you will need to install a dedicated power circuit. Check with our office for the exact requirements of the circuit needed for the model chosen.

We also recommend the use of a refrigerated air dryer with filters to ensure that you achieve the very best air quality. Refrigerated air dryers will remove water from your air supply which can damage air tools and other air equipment. Speak to our staff for the right advice.

Pilot Air Compressors are the benchmark for quality and reliability in Australia.
